

The Hassle Hurdle: a philosophy to hack ADHD

Autumn Tulloch
aughtum.net

Graphic Design isn't really my passion.

I'm not a software dev

but I do have ADHD

Part 1- Duck - Tasker

- Automatically connects and plays my current podcast when shower speaker connected
- Manages do not disturb at home/work
- Automatically connects/disconnects from personal VPN
- Turns headphones off when I've left them on with nothing playing
- Forwards phone calls to my smart speaker when my phone is charging outside of the bedroom at night
- Sent a text at a random time every day to remind my partner to train for the marathon (she loved it)
- Runs an overlay that counts down to any alarms I've got set
- And (used to) set all my alarms.
